Proven Outcomes in Oncology.
More sensitive measures of tumor status, cost-effective cancer staging and optimized patient therapies can be realized through Siemens innovative technologies incorporated in the biograph™ molecular imaging system and COHERENCE™ suite of oncology workspaces.

When you can see the whole picture, you can be more precise. And in treating cancer, precise measures ensure optimum outcomes.

World Journal of Nuclear Medicine

General Information

This will be a publication of the World Federation of Nuclear Medicine & Biology (WFNMB) with the support of the IAEA and will be published quarterly. The purposes of the journal are as follows:

- To be an official publication of the World Federation of Nuclear Medicine & Biology (WFNMB) with the active collaboration and support of the IAEA
- To promote research in nuclear medicine globally and in the developing countries in particular
- To promote good practice in nuclear medicine

Target Group:

- All members of the WFNMB
- All member states of IAEA
- Specialists belonging to various fields of nuclear medicine (Physicians, radiopharmacists, physicists, radioimmunoassayists, molecular biologists, etc.), technologists and nurses
- Manufacturers of equipment and reagents relevant to nuclear medicine
- Atomic Energy Commissions, Governmental and administrative personnel relevant to nuclear medicine practice in the various countries

Contents:

a.General:

Reviews related to the good practice of nuclear medicine

b. Related to WFNMB:

Newsletter

Announcements

Reports of working groups, etc.

Editorials on WFNMB Planning & Strategy etc.

Abstracts of Congresses

c. Related to IAEA and other International organizations:

Newsletter

Announcements

Reports of CRPs, RCMs, Seminars

Abstracts of International Seminars

Periodic world status reports

Regional Windows

Editorials

Cochrane Reviews

d. Research & Development:

CMEs on Clinical subjects as well as on Science & Technology pertaining to nuclear medicine

Original articles

Letters to the editor

e. Windows for the Industry

(coloured pages)

Display Commercial Advertising

It is hoped that the nuclear medicine industry (radiopharmaceuticals, nuclear instrumentation, computer & reagents etc.) will view the journal as an effective means of advertising to the nuclear medicine community. In order that the journal can be self-sustaining, we invite the industry to provide significant support and to assist in raising the profile of this important journal, the first to specifically target the world-wide nuclear medicine community. Besides regular full, half and quarter page advertisements, the journal will also publish special features like "windows for the industry". All advertising materials accepted are expected to conform to ethical, medical and business standards. Acceptance does not imply endorsement by the journal.

Because patients and their physicians depend on you to

Be Right.

Depend on **Cardiolite®** for accurate and complete information

Exercise and pharmacologic stress testing should be performed only under the supervision of a qualified physician. Cardiolite® has been rarely associated with acute severe allergic events of angioedema and urticaria. The most frequently reported adverse events include headache, chest pain/angina, ST segment changes on ECG, nausea, and abnormal taste and smell.

Please see brief summary of prescribing information on following page.

Recent data suggest that MPI agents are not interchangeable

In patients with mild-to-moderate CAD undergoing dipyridamole SPECT, **Cardiolite®** ...!

- **Detected more** ischemic perfusion defects than tetrofosmin¹
- **Demonstrated larger** perfusion defect extent in comparison to tetrofosmin¹
- **Predicted disease** in more than one vessel more accurately than tetrofosmin¹
